

WSSPL

BOPP FILMS

WHITE OPAQUE HEAT SEALABLE WITH LOW INITIATION TEMPERATURE AND ONE SIDE CORONA TREATED FOR CONVERSION

DESCRIPTION

OPP WSSPL is solid white both side sealable with low initiation temperature and one side corona treated **BOPP** film, having modified higher density. This opaque and stiff film is ideal for VFFS & HFFS machines.

PRODUCT FEATURES

- Solid white appearance
- Good stiffness and mechanical properties
- Excellent seal integrity
- Very high heat seal strength and hot tack strength
- Good moisture and light barrier
- Outstanding opacity and whiteness
- Good moisture barrier
- Good opacity and whiteness

APPLICATIONS

Can be used as a part of laminate structure

- Confectionery (chocolate/gum/sugar)
- Bakery (biscuits/cookie/crackers)
- Frozen food
- Dry foods and beverage powders
- Health and beauty care
- Household and detergents

NOMENCLATURE

WS TISPL - Corona treated surface inside

WS TOSPL - Corona treated surface outside

TOPPAN SPECIALITY FILMS

	Heat Seal Range	-	105-145	105-145	°C	Internal Method
	Heat Seal Strength	-	300	350	g/25mm	Internal Method (130°C/1sec/30psi)

The figures and above properties refer to typical values which are indicative only. Customers should verify the suitability of the film for its specific end use. Therefore this document will not represent a product specification.

GUIDELINES FOR STORAGE

Temperature should preferably be less than 30°C & humidity 55±5% in storage areas and material should be consumed within three months of receipt. OPP films should be allowed to reach operating room temperature 24 hours before use.

FOOD CONTACT

OPP films complies with the requirements of FDA, EC & REACH regulations. Specific documentation is available on request.

SAFETY

Compliance with industrial health and safety standards. OPP films do not present any significant danger to health and safety in the workplace, provided they are used for the intended purpose in accordance with conventional practices and that health & safety regulations are observed. Relevant guidelines can be found in our MSDS (available upon request).

CAUTIONS

- Film characteristics are maintained for six months from the date of invoicing
- Please make sure printing surface is well dried before lamination
