TSTISPLHS2

BOPP FILMS

TRANSPARENT HEAT SEALABLE CORONA TREATED ONE SIDE STABLE SLIP
GRADE FOR CONVERSION

AVAILABLE
CALIPERS

DESCRIPTION

TSTISPLHS2 is transparent co-extruded low COF **BOPP** film. It is one side corona treated & both side heat sealable. Untreated heat-seal surface is specially designed to give low stable COF, good seal strength and sealing range which gives robust performance on all types of HFFS & VFFS machines

PRODUCT FEATURES

- Low Seal Initiation Temperature (105°C)
- Exceptional slip properties
- Stable co-efficient of friction
- Total forgiving on HFFS & VFFS machines
- Good printability and suitable for lamination with other substrates
- Good Stiffness, Optical & Mechanical properties

APPLICATIONS

Can be used as a single web or in laminate structures.

- Confectionery (chocolate/gum/sugar)
- Bakery (biscuits/cookie/crackers)
- Chips/snacks/pasta
- Health and beauty care
- Frozen food
- Household & detergents

NOMENCLATURE

TSTISPLHS2 – Corona treated surface is Inside & Untreated Heat seal surface is Outside
TSTOSPLHS2 – Corona treated surface is Outside & Untreated Heat seal surface is Inside

* 38 dyne/cm guaranteed for 4 months from the invoice date in controlled ambient condition as per below storage guidelines.

The figures and above properties refer to typical values which are indicative only. Customers should verify the suitability of the film for its specific end use. Therefore this document will not represent a product specification.

GUIDELINES FOR STORAGE

Temperature should preferably be less than 30°C & humidity 55±5% in storage areas and material should be consumed within three months of receipt. OPP films should be allowed to reach operating room temperature 24 hours before use

FOOD CONTACT

OPP films complies with the requirements of FDA, EC & REACH regulations. Specific documentation is available on request.

SAFETY

Compliance with industrial health and safety standards. OPP films do not present any significant danger to health and safety in the workplace, provided they are used for the intended purpose in accordance with conventional practices and that health & safety regulations are observed. Relevant guidelines can be found in our MSDS (available upon request).

CAUTIONS

- Film characteristics are maintained for six months from the date of invoicing except for wetting tension
