## MSISPLA1-CPP

METALLIZED HEAT SEALABLE WITH LOW SEAL INITIATION TEMPERATURE  
INSIDE METALLIZED BARRIER GRADE & HIGH METAL BOND STRENGTH CPP  
FILM FOR CONVERSION

### DESCRIPTION

It is a co-extruded metallized multipurpose cast polypropylene film. It's one side excellent metal adhesion of deposited metal and other side is broad heat sealable range with Low seal Initiation Temperature. In addition to this, its improved barrier properties make it an ideal choice for sensitive product demanding great protection.

### PRODUCT FEATURES

- Low seal initiation Temperature (SIT ~ 105°C)
- Excellent sealing properties in term of strength, hot-tack and integrity
- Excellent metal bond adhesion
- Remarkable performance on HFFS & VFFS machines
- Good Oxygen & Moisture barrier
- Excellent Seal strength

### APPLICATIONS

- Confectionary (Chocolate/gum/sugar)
- Bakery (Biscuits/cookie/crackers)
- Potato chips/snacks/crisp
- Household and detergents

## PROVISIONAL

	PROPERTIES	REF.	MS22ISPLA1 -CPP	MS25ISPLA1 -CPP	MS30ISPLA1 -CPP	MS50ISPLA1 -CPP	UNITS	TEST METHOD

THERMAL	SIT	-			105		°C	Internal Method
	Heat Seal Strength (0.5sec, 30psi, 130°C)	-	2000	2000	2500	2500	gf/in	Internal Method
BARRIER	WVTR (38°C,90% RH)	-			0.5		g/m <sup>2</sup> /d	ASTM F 1249
	OTR (23°C,0% RH)	-			50		cc/m <sup>2</sup> /d	ASTM D 3985

The figures and above properties refer to typical values which are indicative only. Customers should verify the suitability of the film for its specific end use. Therefore this document will not represent a product specification.

### GUIDELINES FOR STORAGE

Temperature should preferably be less than 30°C & humidity 55±5% in storage areas and material should be consumed within three months of receipt. CPP films should be allowed to reach operating room temperature 24 hours before use.

### FOOD CONTACT

CPP films complies with the requirements of FDA, EC & REACH regulations. Specific documentation is available on request.

### SAFETY

Compliance with industrial health and safety standards. CPP films do not present any significant danger to health and safety in the workplace, provided they are used for the intended purpose in accordance with conventional practices and that health & safety regulations are observed. Relevant guidelines can be found in our MSDS (available upon request).

### CAUTIONS

- Film characteristics are maintained for six months from the date of invoicing except for metallized layer surface tension
- Strongly recommend online corona treatment in metallised films during lamination as treatment level decay with time is a natural phenomenon which depends on ambient conditions (Recommended storage conditions: Temperature < 30 deg C & Humidity 55% (Maximum) in original packed condition)
